Is the END NEAR?

Acts 2:38-39

Then Peter said unto them, Repent, and be baptized every one of you in the name of Jesus Christ for the remission of sins, and ye shall receive the gift of the Holy Ghost.

For the promise is unto you, and to your children, and to all that are afar off, *even* as many as the Lord our God shall call.

Luke 21:28

And when these things begin to come to pass, then look up, and lift up your heads; for your redemption draweth nigh.

Matthew 24:33

So likewise ye, when ye shall see all these things, know that it is near, *even* at the doors.

Weapons Preparation for War

China Steps Up The Pace In Nuclear Arms Race With Russia And US.

Experts are warning that as China continues to increase their nuclear arms race pace, the threat of conflict rises substantially. As China joins the US and Russia in pursuing more targeted nuclear weapons as a deterrent against potential threats, the looming arms race would, in fact, serve the opposite purpose by increasing the risk of a nuclear conflict.

Earth's Crust In Turmoil

What is causing our planet to shake so violently all of a sudden? Rivers of lava have been pouring out of the Kilauea Volcano in Hawaii for weeks, a massive eruption of Mount Merapi just a few days ago shot volcanic ash 38,000 feet into the air, and now rivers of lava are pouring out of Guatemala's Fuego Volcano. Volcano Discovery is reporting that a total of 34 volcanoes around the world are erupting right now. So what is causing so much seismic activity all of a sudden, and is this a new trend that is going to continue? In addi-

tion to the 6.9 quake in early May, a 5.5-magnitude quake rattled the Big Island Sunday in an area near Kilauea volcano, USGS officials said. But of much greater concern were the more than 500 smaller quakes near the summit in a 24-hour period on Sunday, an all-time record. Rivers of lava, one as wide as three football fields, are reaching areas that were not supposed to be reached, and Kilauea just keeps pouring out more. Down in Guatemala, the new eruption of the Fuego volcano poured out lava so violently that it caught many people before they could escape. At least sixty-two people were killed and hundreds more injured on Sunday when Fuego volcano erupted violently, spewing a stream of red hot lava and

belching a thick plume of black smoke and ash that rained onto the capital and other regions. "It's a river of lava that overflowed its banks and affected the Rodeo village. One village near the base of the volcano may end up being completely destroyed by the flow of lava. There are injured, burned and dead people," Sergio Cabanas, general secretary of Guatemala's Conred Disaster Agency, said. I have been writing about the changes to our planet for eight years, and those changes are now accelerating. The number of earthquakes around the globe continues to rise, and volcanoes are beginning to behave in some unusual ways. (prophecynewswatch.com 6/5)
