

The Endtimes Are Now!

End-Time Weariness: Haven't We Waited Long Enough?

The malady goes by many names: End-time weariness; Rapture fatigue; Israel burn-out. The results are the same: The scoffers and skeptics are gaining too much territory and too many followers. These are just a few of many reasons why this glorious message that years ago had nearly every Christian excited that "today might be the day" is now a big yawn! It is now a wake-me-when-it's-over sentiment. Add to that the fact that our churches have dropped this message!

So when stunning events take place such as the moving of the U.S. Embassy to Jerusalem, the aligning of the nations in the Mideast that could be a part of the Gog-Magog War, and the convergence of dozens of end-time signs, there is a collective sigh. Some will say it's déjà vu all over again. You said that 40 years ago. Nothing happened.

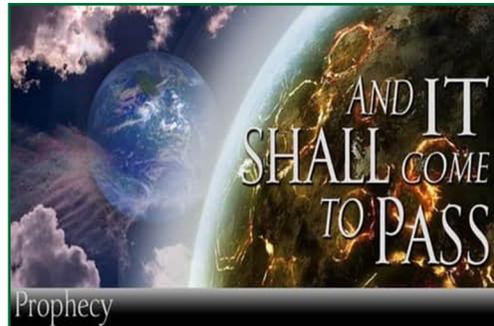

So the fact that things are all coming together excites only a tiny remnant who will never grow weary of keeping their eyes on the sky! If you are among them, hang in there. He is coming soon and Israel remains the apple of God's eye! (prophecynewswatch.com 7/13)

Jesus Will Return Right On Time

And let us not be weary in well doing: for in due season we shall reap, if we faint not. (Galatians 6:9)

We must stay focused on the Word of God, Everywhere distractions abound. Through all types of media the human mind is bombarded with worldliness and evil. We have control over much of the distractions and humanistic

ideology we receive. Simply turn off the radio and televi-

sion, and shut down the internet. Dare we not stop to com-

pare the amount of time we spend in prayer and Bible reading and study to the time we spend on our smart phones and before the television? The return of Jesus for the church is a one-time event. There will not be a "second flight." Either we will be ready or left

behind. The time to prepare is now!

Around the World

UN Targets Media Outlets That Speak the Truth About Muslim Migrants.

The UN cannot be fixed because its foundations are corrupt. They say with their mouth they are for rights, but they demonstrate in actions they are only about money and power, not rights. (freedomoutpost.com 7/30)

Jerusalem Fast-Tracks Approval of Major

US Embassy Expansion. Mayor signs permits for 700-square-meter annex at former consulate, including new offices, service areas and entrances. (timesofisrael.com 8/3)

Police on Alert for Violence as Jerusalem Prepares for Largest-Ever Gay Pride Pa-

rade. 2,500 officers to be deployed throughout the city ahead of Thursday march; dozens of right-wing extremists and anti-LGBT activists say police warned them not to disrupt it. (timesofisrael.com 8/1)

Germany: the

Rise of the Salafists. The number of Salafists in Germany has doubled over the last five

years and now exceeds 10,000 for the first time, according to Germany's BfV domestic intelligence agency. BfV estimates that Germany is home to more than 25,000 Islamists, nearly 2,000 of whom pose an immediate threat of attack. Salafists see themselves as defenders of an original, unadulterated Islam. Salafists want to establish a 'theocracy' according to their interpretation of the rules of sharia, one in which the liberal democratic order no longer applies. Political and jihadi Salafists share the same basic ideology. They differ primarily in the means by which they wish to achieve their objective, the 'Salafist theocracy.' (prophecynewswatch.com 7/31)

US Expected to Become World's Top Oil Producer Next Year.

The U.S. has nosed ahead of Saudi Arabia and is on pace to surpass Russia to become the world's biggest oil producer for the first time in more than four decades. The latest forecast from the U.S. Energy Information Administration predicts that U.S. output will grow next year to 11.8 million barrels a day. "If the forecast holds, that would make the U.S. the world's leading producer of crude," says Linda Capuano, who heads the agency, a part of the Energy Department. (onenewsnow.com 7/13)

No Place to Hide—Tools for Anti-Christ

Facial Recognition Technology Will End Your Privacy.

The Chinese police in Nanchang made news in mid April when the press reported the arrest at a concert of a man wanted for fraud. The story was significant because automatic facial recognition systems, linked through now 176 million cameras across the country (rising to 600 million by 2020), had picked the man out of a crowd of 60,000 concertgoers and allowed the police to pinpoint his location in real time. Feds Plan to Take Ownership of Your Baby's DNA. Obama rule change could put most personal data in government's hands. Parents experience that infinite joy of coming home from a hospital with their very own newborn. Except soon, the newborn might not be all theirs. The "Common Rule" bill would give the federal govern-

ment ownership of that infant's DNA, obtained from blood samples taken at birth to screen for threatening diseases. The warning comes from the Citizens' Council for Health Freedom, which has fought for the privacy rights of parents and children for years. The original "Common Rule" bill required parental consent for use of their baby's DNA for federally funded research. The revised bill signed by President Obama in January, 2017 removed the parental consent. Unless President Trump again renews

the "hold" he had placed on the bill, it will go into effect on July 19, 2018.

Heat, Drought, Destruction

We Are Seeing Heat and Drought in the Southwest United States Like We Haven't Seen Since the Dust Bowl of the 1930s.

(freedomoutpost.com 7/25)

Australian Farmers Battle WORST Drought in 100 Years: 'It's Dire!' Southeast Australia has experienced drought-like conditions for the past seven years. Yet, worsening conditions are now forcing ranchers to cull their herds because it is becoming too expensive to feed them (*The Guardian*, June 9, 2018). The drought which is intensifying, is so widespread there's just no options left for stock producers. Soil moisture levels are extremely low and may prevent winter planting and towns cannot provide water needed for residents. This will have far-reaching ramifications. (twnews&prophecy.com 7/13)

More Heatwaves and Fires. In recent days, multiple parts of the globe have experienced searing temperatures and devastating fires. Currently, deadly fires have claimed lives, destroyed homes and scorched thousands of acres in California, western Canada, Greece, Sweden, the Netherlands and Britain, and heat is even searing Finnish Lapland above the Arctic Circle. *The Economist* recently stated, "Heat is causing problems across the world," and as fires burn in Siberia, "Japan is in a state of emergency" and "has declared its heatwave to be a natural disaster" (July 28, 2018). In

addition to the expensive destruction of property caused by fires, there is also the loss of lives due to both the fires and the heat itself. Extreme heat is especially dangerous for the elderly and very young, but it also ravages crops, decimates livestock, causes power outages and increases the risks of lightning strikes (*The Telegraph*, July 27, 2018). The actual costs of these current heatwaves, in terms of lives and property, will not be known for several months. What many do not realize today is that the Bible warns that extreme temperatures will also be one of the signs of the end of the age. While the current heatwaves may not be the direct fulfillment of Bible prophecies, they provide insights into what will happen in future years. Jesus warned that famines at the end of the age will be part of the "beginning of sorrows" (*Matthew 24:7-8*). Later, in the book of Revelation, God warns that fires will burn up one-third of the trees and all the grass (*Revelation 8:7*). And at the very end, the sun will burn even hotter and scorch the earth just prior to Jesus Christ's return to rule the earth (*Revelation 16:8-9*). Scientists suggest there will be more frequent cycles of extreme heat in the years ahead—which the Bible also confirms, though, perhaps, for reasons far different from those that scientists will accept.
