Massachusetts Attorney General: Family Behind Oxycontin Is Responsible For Opioid Epidemic. The Massachusetts attorney general has declared that the family behind the drug Oxycontin is responsible for the opioid epidemic ravaging the U.S. Purdue Pharma and eight members of the Sackler family who own the company, are being accused of personally starting the opioid crisis by deceptively selling Oxycontin. According to *CBS News*, MA attorney general, Maura Healey alleges the Sackler family hired "hundreds of workers to carry out their wishes." Those wishes included pushing doctors to get "more patients on opioids, at higher doses, for longer than ever before" all while paying "themselves billions of dollars." In her lawsuit, Healey names eight members of the family that own Purdue Pharma, alleging they "micromanaged" a "deceptive sales campaign." In the conclusion to the complaint, Healey said the Sackler family used the power at their disposal to engineer an opioid crisis. About 400,000 people died from opioid over-

doses between 1999 and 2017 according to the CDC, or about 130 per day. (freedomoutpost.com 1/28)

New York Landmarks Lit Up in Pink to Celebrate Legalizing Abortion Until Birth. Wild cheering and applause erupted in the New York State legislature as lawmakers voted on Tuesday to declare abortion until birth a "fundamental right" and strike any protections for children in the womb from the books. January 22 was chosen to celebrate the anniversary of *Roe v. Wade*, which has resulted in the destruction of more than sixty million pre-born children since 1973. (prophecynewswatch.com 1/28)

Uncle Sam Wants Your DNA: The FBI's Diabolical Plan to Create a Nation of Suspects. As the *New York Times* reports: "The science-fiction future, in which police can swiftly identify robbers and murderers from discarded soda cans and cigarette butts, has arrived. In 2017, President Trump signed

Reports flood our homes about the hatred and violence in our world. Isn't it comforting and refreshing when we focus instead on love, the love of God and the love of our brothers and sisters.

Some World Events

Report: China, Russia, Others Developing Super-EMP Bombs. A new Congressional report claims China, Russia, North Korea, and Iran are making powerful nuclear bombs to create super-electromagnetic pulse (EMP) waves when detonated high above the earth. These EMP waves can destroy all electronics and power grids over areas as large as the U.S. According to *The Washington Free Beacon*, these countries have EMP weapons built into their military plans, a revolutionary new way of warfare against military forces and civilian critical infrastructures. Coincidence? Venezuela Green Lights Russia to Mine Gold, Days Later US Attempts Overthrow. The decades-long US infatuation with Venezuela came to a head on Wednesday as the United States, Canada, Brazil, and others all declared a man who never even ran for the office of presidency, much less got elected to the office, as the president of Venezuela. into law the Rapid DNA Act which, starting this year, will enable approved police booking stations in several states to connect their Rapid DNA machines to Codis, the national DNA database. Genetic fingerprinting is set to become as routine as the old-fashioned kind." Referred to as "magic boxes," these Rapid DNA machines are portable, about the size of a desktop printer, highly unregulated, far from fool-proof, and so fast that they can produce DNA profiles in less than two hours, allow police to go on fishing expeditions for any hint of possible misconduct using DNA samples. California Dept. of Education Wants to Teach Your Kindergartners There Are 15 Genders. The curriculum being looked at claims that it is an impossibility to know whether a baby is a boy or a girl or something else...forget that 6,000 years of history has taught us the difference. California's indoctrination of young children allows no opt-out by parents. (freedomoutpost.com 1/24)

Israel

Natural Gas Fields Give Israel a Regional Political Boost. Its newfound riches have fostered economic bonds with its neighbors, tightening relations with Arab allies and built new bridges in a historically hostile region, even without significant progress being made toward peace with the Palestinians. Last week's inclusion of Israel into the Eastern Mediterranean Gas Forum in Cairo, a consortium aiming to cut infrastructure costs and lower prices, marked the first time Arab countries accepted Israel into such a regional alliance, sparking excitement in the

country that its long-held hope of finally making "economic peace" with Egypt and Jordan was fast approaching. (onewsnw.com 1/23)

Israel, Iran & Syria Exchange Threats of War. The exchange of missiles between the IDF and Iranian forces based in Syria on Sunday represented a major escalation of a conflict that has been simmering at a low level for months. Israel will not allow Iran to be entrenched in Syria thus the Jewish state is now in "open confrontation" with Iran. (prophecynewswatch.com 1/24)

The Instability of Our Planet

2019: 81 Significant Earthquakes In Alaska So Far. But now North America is rattling, and that isn't going to be so easy to brush aside. (freedomoutpost.com 1/20)

Indonesia Raises Alert Level as Volcanic Eruptions Intensify. Eruptions again intensified from an island volcano that triggered a deadly tsunami and mudslides at the weekend killing 430 people, 159 missing, 1500 injured. (washingtonpost.com 12/27)

4.7 Magnitude Earthquake Reported Off Coast of Maryland. (baltimoreecbslocal 1/15)

4.4 Earthquake Recorded in North Central Oklahoma. (kfor.com 1/15)

3.4-Magnitude Earthquake, 2 Aftershocks Rattle Bay Area. (kroon.com 1/16)

Polar Vortex of 2019. When the polar vortex is weak or "perturbed," the flow of air is weaker and meanders north and south, rather than west to east. This allows a redistribution of air masses where cold air from the Arctic spills into the mid-latitudes and warm air from the subtropics is carried into the Arctic. The National Weather Service in Chicago forecasts it will be the coldest Arctic outbreak in 25 years and perhaps since records have been kept.

Big Brother Technology

Big Brother Digital License Plates Coming to a State Near You. Michigan became the second state to roll out the world's first digital license plate called the "Rplate." Reviver Auto boasts that a total of five states have already approved their digital license plates. "Our innovative, multi-functional digital license plate, the Rplate Pro, will be on the road in California, Florida, Arizona and Texas in 2018". George Orwell could never have dreamed of a world where license plates became a tool for more government surveillance. No longer will law enforcement have to run your license plate to see if you paid your taxes and insurance, because now your license plate will display a big "X" notifying everyone that you are a viola-

tor. Digital license plates are the epitome of Big Brother surveillance. They will display Amber Alerts and much more. It lets you update the registration stickers on your car through an app instead of dealing with the DMV. If someone steals the car, it can read \$NDHLP! or the more serious Stolen Vehicle. It can track your car's location so you can keep tabs on your teenager, and with more states considering a tax by the mile plan no doubt this system will make it that much easier. According to Reviver Auto, motorists will pay a \$99 annual subscription fee and a monthly \$8.00 LTE fee for the privilege of being surveilled. (prophecynewswatch.com 1/24)

Earth's Magnetic Pole Is Experiencing A "Sudden Shift"

Deep beneath the earth's surface, liquid iron is sloshing around at its core causing the North Pole to move away from Canada and towards Siberia. This has caused global geomagnetism experts to undergo an urgent update of the World Magnetic Model where it will alter where exactly North Pole is. The next update was not scheduled to happen until 2020, but the accurate location of the North Pole is needed for GPS across the globe. Currently it is close to exceeding "the acceptable (safe) limit for navigational errors." The movement of the north magnetic pole has been the object of study since 1831. Initially, it was tracked moving into the Arctic Ocean at a rate of about 15km each year. But, since the mid 1990s, it has picked up speed. It's now shifting at a rate of about 55km a year.

At the same time, earth's magnetic field has been getting weaker and weaker, and this has many experts deeply concerned that we could soon experience a catastrophic pole flip. If that happens, it will be a cataclysmic event beyond anything that we have ever experienced before. If a sudden pole flip happened today, electronic devices all over the world would be crippled, an event that would be even worse than a direct hit from a massive electromagnetic pulse from the sun. Scientists tell us that earth's magnetic field has flipped before, and that it could soon happen again. According to a team of international scientists, including from the Australian National University (ANU), we truly live in apocalyptic times, although most people still don't seem to understand what is happening.
